**Added value for  
garden centres.**

## MeerDeur. Added value for garden centres.

Modern garden centres are increasingly becoming retail centres. Because of this development, customers are also changing their expectations. The customers of today and tomorrow expect a decor that encourages fun shopping, and that starts with an inviting entrance. Automatic doors welcome your customers in a modern way. There's no better entrance than having doors that slide open. And it's the same when leaving the garden centre with a full trolley - an automatic door contributes to the quality of the shopping experience. Which supplier is ready and able to translate your needs and requirements into an optimum entrance? MeerDeur. Our name says it all: we are a supplier that also gives your entrance added value.

No two entrances are the same since both the dimensions and construction requirements vary. It is important to know that MeerDeur can handle the entire process itself, from design and engineering through to installation of your door, so you are guaranteed made-to-measure service and a wide range of choices regarding systems. MeerDeur has its own production unit designed for producing all types of doors. And we use aluminium profiles to give form to your door.

### **Welcome your customers automatically!**

Ease and accessibility require innovative solutions such as the Gatemaster® Excel electronic drives. For customers with shopping trolleys, buggies, wheelchairs or mobility scooters, an automatic door is the answer. You can set the drive yourself to determine how far the door should open, how fast and for how long. These and other options can easily be managed on the user-friendly control panel.

### **Safe and reliable**

This efficiency goes hand in hand with maximum safety: measuring systems detect when something is blocking the door. Thanks to the automatic reversing design, the door returns to the open position. The microprocessor then carefully sends the door to the position where it detected the obstacle. The Gatemaster® Excel carries out the next closing cycle at half speed to check if it's safe again. If required, MeerDeur can fit your automatic door with even more safety options.

### Reliable and durable

The Gatemaster® Excel is known for its excellent reliability. A one-year guarantee is standard, and taking out a service contract will ensure reliability and safety over a longer period. We can promise you will have many years of safe use with a Gatemaster® drive. The automatic systems are very robust, being designed for long-term operation.

### A partner that understands your business

Ordering from MeerDeur is a pleasant business. MeerDeur is a reliable partner that fulfils its agreements and also has a healthy element of built-in flexibility to accommodate planning changes efficiently. You always have access to an advisor who understands business: your business. Would you like to receive more information without any obligation? At MeerDeur the door is always open.
